PRESSURIZATION UNITS

A Pressurization Unit is ideal for industrial applications where outside contaminants need to be prevented from entering pressurized controlled areas. Such areas include control rooms, mechanical rooms, electrical rooms, laboratories, and more.

Key Benefits:

- **Contaminant Prevention:** Ensures a clean and controlled environment.
- **Enhanced Safety:** Protects sensitive equipment and processes.

STANDARD FEATURES

- Door-Mounted On/Off Disconnect Switch
- Door-Mounted Controls Display
- Building Pressure Controller with Adjustable Setpoints
- High Efficiency Motor
- Micro Drive VFD
- 2" MERV-13 Final Filter
- Barometric Relief Damper
- Low Pressure Alarm Contacts
- Emergency Stop Connection Point

- Through the Wall Mounting
- Steel Construction
- White Powder Coating
- Manufactured with UL-Listed Components

OPTIONAL FEATURES

Enclosure Construction

Choose from Galvanized, Aluminum, 304SS, or 316SS

Custom Paint Colors

Available in Powder Coating or Epoxy Color

Hazardous Location Components

Ensuring safety and compliance with hazardous location standards.

Filter Options

Available with Additional 1" Pre Filter and Larger 4" MERV-13 Filter

Voltage Options

Compatible with 3PH 208/230/460

Dirty Filter Sensor Alarm

Helps maintain optimal airflow and filtration efficiency

Enhance your industrial environment with our Pressurization Units. For pricing and more information on how our tailored solutions can meet your specific needs, contact Hunton Engineered Products.
